

**McCAULEY'S®**  
an **Alltech®** company

**Alam®**

Pelleted feed for horses with special dietary needs

Net Weight 50 lbs. (22.7 kg)

**Alltech Ingredients:**

Yea-Sacc®, Bioplex®

Helps to maintain good body condition

Contains minimum levels of starches and sugars

Designed for horses with metabolic issues, dental challenges or other special dietary needs

Added yeast supports optimal gut function and health

## Feeding Recommendations

Feed 0.5 to 2 lbs. per 100 lbs. of body weight per day. This guideline is for horses with a mature body weight range of 1,100–1,300 lbs. (500–590 kg). The amount of feed given at any one time should be no more than 0.5% of the horse's body weight. For example, a 1,000-lb. horse should be fed no more than 5 lbs. per feeding.

Free-choice salt and fresh, clean water should be available to the horse at all times. It is important to remember that each horse has individual feeding needs and that these needs may vary depending on the season, the hay quality, and the horse's life stage and level of work. Consult with your veterinarian or one of our nutritionists for specific dietary recommendations.

## Our Story

When McCauley Bros. Feed & Seed, Inc. was initially established in 1938, FDR was president, the ballpoint pen had just been invented, and a gallon of gas cost a whopping 20 cents.

Some 20 years later, with a passion for Thoroughbred horses and a heartfelt desire to take the guesswork out of equine nutrition, Graham McCauley began converting his family's traditional farm store into an equine-focused feed business that was, in many ways, the first of its kind.

Although many years have passed, our focus on feeding horses with wholesome, highly effective ingredients remains the same. We have had the pleasure of feeding countless horses — from Olympians to Triple Crown winners and many beloved companions in between — all while maintaining the highest standards of feed quality and safety.
