# TRINERGY®

Pelleted nutrient balancer for performance horses

### Alltech Ingredients:

Actigen®, Yea-Sacc®, Bioplex®, Integral A+® and Sel-Plex®

Will meet or exceed all nutrient requirements as defined by the National Research Council (NRC) when fed as directed

Supports/maximizes immune function

Designed to support healthy gut function

Highly palatable and digestible

Antioxidant-rich

Fulfills all vitamin and mineral requirements for horses in intense work

## Feeding Recommendations

Feed 1 to 2 lbs per day (mature body weight around 1,100 lbs/500 kg). Trinergy can be top-dressed, mixed with grains such as oats or fed solely. Good quality forage (hay and/or pasture) should also be provided. The actual amounts required will depend on factors such as body weight, age, intensity and amount of work, season or climate and individual efficiency.

The following table is offered as a guide. The actual amount of oats (grain) and forage fed should be adjusted for the individual horse.

Workload	Trinergy (lbs/day)	Amount of Oats (lbs/day)	Minimum Amount of Hay or Pasture Equivalent (lbs/day)
Light	1	4	15
Moderate	2	8	15
Intense	2	14	10

**SEL-PLEX® INTEGRAL®**

## Our Story

When McCauley Bros. Feed & Seed, Inc. was initially established in 1938, FDR was president, the ballpoint pen had just been invented, and a gallon of gas cost a whopping 20 cents.

Some 20 years later, with a passion for Thoroughbred horses and a heartfelt desire to take the guesswork out of equine nutrition, Graham McCauley began converting his family's traditional farm store into an equine-focused feed business that was, in many ways, the first of its kind.

Although many years have passed, our focus on feeding horses with wholesome, highly effective ingredients remains the same. We have had the pleasure of feeding countless horses — from Olympians to Triple Crown winners and many beloved companions in between — all while maintaining the highest standards of feed quality and safety.
